

TikAPI Summary for TikTok Data Scrapping

Data Capture Capabilities

TikAPI can capture the following information from TikTok posts:

1. Post description
2. Comments on the post
3. Hashtags
4. Date posted
5. Number of views
6. Number of comments
7. Number of likes
8. Number of shares
9. Video/Post URL
10. Country (partially - can specify country for requests, but unclear if it returns video's origin country)

Cost

- Current pricing: \$189 per month (Business plan)
- No mentioned on-demand or alternative pricing options

Limitations

- Daily limit: 10,000 API requests per day
- Some endpoints are restricted to "PremiumOnly" or "trusted customers"
- Rate limiting may apply.

Features and Benefits

1. Comprehensive data capture (all required fields available)
2. Both public data access and authenticated user endpoints
3. Real-time live chat and gifts data for live videos
4. Analytics endpoints for business or creator accounts
5. Search functionality across various categories (users, videos, hashtags)
6. Access to trending posts and explore feed

Additional Notes

- Part of the Claude 3 Opus
- Offers unlimited OAuth users
- Includes premium support
- API documentation is comprehensive and well-structured
- Provides SDKs for JavaScript and Python

Potential Concerns

- As a third-party API, it may be subject to changes in TikTok's platform policies
- Some features are restricted to trusted customers, which may require additional vetting or costs.
